DEQ would like to have a video conference call with EPA and DEQ to discuss the site and decide on a clear strategy to move forward in the NPL process. DEQ would like to have the video conference as soon as possible and before the upcoming holiday season begins to complicate coordinating the discussion. I propose sometime during the week of October 31st. Will this work for EPA?

Thank you.

OK guys, you've finished with the assessment of this site and now the state has to decide what it intends to do with the site. Let me know our next step.
